Information on reporting structure in organisation (include information on any relevant committees, for example, a Clinical Research Board / Research Committee / Steering Committee.)

Reporting Structures

The Research and Innovation Strategy Group meets quarterly and reports into the Clinical Quality, Learning and Improvement Group (CQLIG) and The Executive Assurance Group which has delegated powers from the Foundation Trust Board. An annual report is also submitted to the Trust Board. In addition, quarterly KPIs are reported to the Board. Internal assurance and monitoring is through the quarterly Quality and Safety dashboard. A flowchart showing the reporting structure is included below.

Indicate what processes are used for managing Research Passports

Research Passports (RPs) are managed by the R&D Office and HR in accordance with the current guidance: HR Good Practice Resource Pack (http://www.nihr.ac.uk/systems/pages/systems_research_passports.aspx). The flowchart for processing research passports and letters of access (LOAs) is shown below.

Note: The boxes highlighted in blue show actions to be done at lead NHS site. HRC will be issued by lead site if researcher is carrying out research on that site; if not, a LOA will be issued.

Escalation Process

Information on the agreed Escalation Process to be used when R&D governance issues cannot be resolved through normal processes: The Research and Innovation Strategy Group (RISG), chaired by the R&D Clinical Lead (co-chaired by the Medical Director), will discuss any issues arising which cannot be resolved through day to day governance processes. Depending on the issue, the matter may also be referred to the relevant specialist, e.g. the Trust legal representative, the Caldicott Guardian, Risk Manager, Medical Director or Assistant Director of Healthcare Governance. The matter may also be discussed by the Quality Assurance & Improvement Committee or the Clinical Quality Learning and Improvement Group. If the issue is a Suspected Unexpected Serious Adverse Reaction (SUSAR) this will be reported via the Risk Department and escalated through the Serious Incidents Requiring Investigation procedure within the Trust (see SIRI policy). All adverse events and reactions are automatically reported to the trials office for the Trial concerned.

Planned and Actual Studies Register

The Organisation should maintain or have access to a current list of planned and actual studies which its staff lead or collaborate in.

Comments

In addition to using the national EDGE database, the Trust holds an internal database and tracker which lists all the current and planned studies. In addition to this all studies undergoing the approval process are tracked at each stage and studies currently running are monitored for level of patient recruitment and performance against target recruitment. All National Portfolio studies currently running are listed on AireShare, together with their protocols and other study documentation.

Other Information

For example, where can information be found about the publications and other outcomes of research which key staff led or collaborated in?

Other Information (relevant to the capability of the Organisation)

Information regarding publications, conference presentations/posters and the outcomes of research are held in the R&D Office and published in the Annual Report and the Quality Account. A register of IP is also held in the R&D office.
