

Finding your way around Airedale General Hospital

When you arrive at the main entrance, you will see this sign. Follow the directions to the zone or building you need.

For emergencies or labour admissions, follow the directions in red.

Information points are located at all building entrances. The map tells you the zone where you have entered the building.

Information points are also at key sites within the building. To find the location you need, look for the department or ward in the A to Z list. This will give you the zone and the location number.

Thank you for choosing Airedale NHS Foundation Trust for your care. An appointment has been made for you to see

On: Monday
 At: Trauma and orthopaedics Clinic
 Outpatients - Zone A, located in Zone A at A1

You may, however, be seen by a member of their team. If you are unable to attend this appointment, and so that I can give the appointment to another patient, please telephone and ask for the appointments clerk.

Please see overleaf for information about the hospital.

If you have an appointment letter, this will also tell you the zone and location number for the department or clinic.

Follow the internal signage to find your location. This is a directional sign that will help you to find zones, entrances and car parks. You will see these at entrances and where zones begin and end.

This is a location sign. You will see these as you walk through the building. As you move through a zone, the numbering will tell you that you are moving in the right direction.

This is a ward information board. Each ward has one of these outside its entrance. It displays the ward number.

If you are staying in hospital on one of our wards, please let your relatives and friends know the location of your ward so that they can find you easily. For example, 'I am on Ward 2, it's in zone C at C14'.

If you have any queries or concerns, please contact PALS (Patient Advice and Liaison Service) on 01535 294019 or email pals.office@anhst.nhs.uk
